

Orange Foliar

Fermented Energy Solution for PLANT REPRODUCTIVE PHASE

Net Litres

Batch #

Suitable for application by boom spray, foliar misting or aerial spraying

This product is ALIVE!
Carefully read instructions

All Microlife products are made with high-grade materials to give the best possible results when directions are followed.

Storage and Handling

- While this product is organic, please wear protective gloves and face shield.
- Handle with care.
- Store away from direct sunlight, and at temperatures less than 30°C to protect the living brew.
- Do not store for longer than the product's shelf life of 9-12 months.

Mixing Instructions:

Before dilution, agitate container contents well.

1. Half fill the tank with non-chlorinated water.
2. Add compatible products as required under agitation.
3. Finally add MicroLife Orange with water, to remainder of tank, while under agitation.

DO NOT USE WETTERS OR SPRAY OILS

**REVERSING SALINITY
REGENERATING SOIL
RECONSTITUTING CARBON**

to increase land values & sustainable profits

Added Benefits of Microlife ORANGE FOLIAR

- **INITIATES REPRODUCTIVE PHASE**
phosphorus energy carries nutrients within the plant
- **MAXIMISES THE PLANT REPRODUCTIVE RESPONSE**
using phosphorus and nitrogen chelation technology
- **PROVIDES BALANCE FOR PLANT FRUIT & SEED FILLING**
and to act as the base for other nutrient reactions necessary for growth
- **INCREASES BENEFICIAL LEAF MICROBIAL ACTIVITY**
significantly reducing leaf diseases and pathogens such as rusts & fungal diseases resulting in a healthier leaf surface

increasing crop resistance to pests and frost through a higher brix level

offering a non-toxic alternative buffer if chemical nutrients are initially needed in leaf programs & detoxifies the harmful side effects from chemicals to the leaves' life energy managers - the micro flora and fauna

CAUTION DO NOT SWALLOW, KEEP AWAY FROM EYES

This product is filtered to 200 microns.
Filters finer than 200micron may experience blockages

CROP	L/ ha	COMMENT
Broad Acre		
Dry Land Cereals, pulses, oil seeds, pastures, lucerne, sorghum Irrigated Cotton, potatoes, peanuts sugar cane.	10 L	Apply Microlife Orange to crop from six leaf stage, panicle initiation, to late tillering or up to pre-flowering in pulse crops. Always check compatibility before mixing with herbicides, prescribed soluble nutrients or other chemicals. Applied to stimulate plant growth using Microlife chelated nitrogen, calcium & phosphorus. Use preferred water rate of 100 L/Ha
Horticultural	20 L	Apply after fruit set, budding, after flowering and onwards. Prefer water rate up 3000L/ha in full canopy situations.
Vines & Tree	20 L	Apply after fruit set, budding, flowering and onwards. Preferred water rate 500-900 L/ha at full canopy

CONDITIONS OF SALE

- The buyer assumes all responsibility for storage, application and use of the product.
- The buyer is obliged to read the Instructions fully and to only use and store the product as instructed.
- Liability is limited to replacement of any poor quality or faulty goods.

Fermented using: Carbohydrates, Fish Emulsions, Kelp, 3.8% min Chelated Ca, N, P, K, Mg,Fe, Mn Humic & Fulvic Acids
